

Contributing to the JSON File

Thank you for your interest in contributing! Follow the steps below to add your repository to our JSON file:

1. **Fork the repository.**
2. **Clone your fork to your local machine.**
3. **Open `repos.json` in `src/app/opensource`.**
4. **Add your repository details in the following format:**

```
{  
  "repoName": "your-repo-name",  
  "repoOwner": "your-github-username"  
}
```

5. **Commit and push the changes to your forked repository.**
6. **Open a pull request (PR) on the original repository.**

By following these steps, your repository will be added to the JSON file and will be included in the project!
